RAINBOW GARDENS
Middleton, Idaho

N. H. Lines holding his prize Glad, Chinook.

FOREWORD—Please Read

We desire to express our thanks to all our old customers for their splendid patronage in the past, and assure you we will do our best to merit your confidence in the future. We have harvested the finest crop of bulbs ever, and can assure you the best of quality. If, for any reason, you are not highly pleased with what we send you, we hope you will let us know immediately, and we will gladly make any adjustments possible. We have added quite a few new varieties, and have dropped some we listed last year to make room for these new ones. We especially desire to call your attention to our own new introductions: La Valle, Nellie Lou, Chinook, Rose Plume, Keefer, and Buff Queen. You will note how many others are listing these this year. They have either seen them at the shows, or grown them themselves, and know they are real comers. You will make no mistake in getting a start of these this year, as they will soon be in great demand. Prices on these will be the same in 1951.

OUR OWN INTRODUCTIONS

CHINOOK (Lines) 532 class. This one leads the list. A pure, rich, clear salmon, no markings of any kind. A real sensation. Grows nearly six feet tall, always straight. Opens 9-6" florets with plenty more showing color. Holds its size to the last bud. Extra good keeper. Production and germination good. A basket of Chinook is breath-taking. Will be in great demand soon. Better get a good start now. **Any size bulbs, \$3.00. Blts., 10—\$2.00 with each bulb.**

Don Henderson, Iowa, writes: "Chinook bulb gave me two fine spikes. Both were exhibited at our state Glad show in Waterloo. One placed first in its color class, the other second in recent introductions amid stiff competition. Everyone was impressed by the clarity of its color."

C. Wesselman, Canada, writes: "My what a Glad. I believe it could be called sensational. Height, 60"; head, 30"; florets, 7"; and 9 open; 24 buds. Perfect facing and placement. No sign of wilt on our hottest days. You have introduced it at a very low price."

Wendell H. Keen, 366 Circuit Dr., Roseville, Calif., writes: "I could write on and on about this wonder Glad. It is, in my opinion, the greatest Glad introduced since Picardy. I grow over 165 named varieties, and Chinook out performed each and every one in my patch, it was a sensation to say the least. It grew slightly over six feet tall; 24 florets, 10 open, 9 showing color, and it took our hot July sun exceptionally well. I could not find any weakness in it. The bulb produced 96 bulblets of better than average size. Again I say, it is truly a wonderful Glad anyone should be proud of. If I could have entered it in our show in Sacramento last June, I am sure it would have won highest honors."

Dr. Cason, Tenn., writes: "Chinook, the most robust grower in our entire patch; 28" head, 18 buds, 6 open. Smooth, deep salmon pink with absolutely no flecking. Shades slightly lighter in throat which has no markings whatsoever. Slightly ruffled. Very favorably impressed and well worth trying further."

LA VALLE (Lines) 507 class. Light ivory cream with small orange throat marks. Not a blotch, just a feather, that adds to its beauty. Consistently grows five feet tall. Opens 8—5½" florets on an 18 bud spike that is always straight. Florets are so rich in color they immediately attract attention. Easily the leader in its class, and will win whenever it hits the shows. Produc-

tion and germination good. Bound to be in great demand. Scores 81 in the R. I. Trial Gardens. **Any size bulb, \$3.00. Blts, 10—\$2.00 with each bulb ordered.**

Dr. Cason, Tenn., writes: "Looks like Lines has something here. A cream with faint buff tints in the delicately crimped border. Rich, bright, light yellow throat with fairly prominent brush marks of orange. 24" head; 5" florets; 16 buds, 7 open. Healthy plant and excellent bulbs at digging. Certainly bears watching."

Sidney Mode, Canada, writes: "Your La Valle is grand. A beautiful, healthy, vigorous variety which is without doubt the leader in the 07 class. It stood our adverse weather and produced gorgeous spikes. I could do some winning with La Valle if I had sufficient stock."

O. M. Farrington, Rt. 3, Lexington, Ky., who has developed some mighty good ones like Gail-Gene and Retta Jo, tested some of my new ones and wrote on November 13, 1949: "My guess is, La Valle will be heard from not only in the North where most Glads grow nicely, but also in the South and mid-West. The three best in my test plot were La Valle, Nancy, and White Challenger. La Valle was the best of the new introductions. It took the hot humid weather and grew shoulder high. It is a good Glad, and by far the best I've seen in that color."

NELLIE LOU (Lines) 542 class. Almost a true flesh pink with small strawberry throat mark. Grows 5½ feet tall, always straight. Opens 8 to 10 5½" florets on a 20-bud spike. Excellent keeper, good shipper. Will open to the last bud when cut. Not just another pink with a new name, but something different and really outstanding. Have never seen anything just like it, or more beautiful. It will win its share of the ribbons. A healthy grower, and one that can take the bad weather and still make good. **Any size, \$3.00. Blts., 10—\$2.00 with each bulb ordered.**

Ray Koenig, Waterloo, Iowa, writes: "Nellie Lou came almost right for our State Glad Show in Waterloo. Grew 70" tall in field. Cut it on Wednesday for our show on Saturday. Held up well. Opened 7 florets with 8 showing color, on a 19-bud spike. Won first in its class. Also won a vase for the longest flower head in show, 32½". I think you have a real grower in Nellie Lou. Also cut another good spike from same bulb."

Sidney Mode, Canada, writes: "Nellie Lou grew nearly six feet tall. Had very large florets on a tall, straight spike. It was one of my prize winners. Was not affected by our severe drouth and heat."

ROSE PLUME (Lines) Here is a complete break in color. Nothing like it. A very soft velvety rose that leans slightly to the red side of rose. No markings of any kind, but a little lighter in throat. When well grown, it makes spike with 10 or more open and all the rest in color. 5½" florets on an 18-bud spike. Has a glossy sheen that makes it very attractive. Quite an early bloomer. Production and germination good. Believe you will like it a lot. **Any size bulb, \$3.00. Blts., 10—\$2.00, with each bulb ordered.**

Bruce Collins writes: "Your Rose Plume so far is my personal choice. It is one of the finest Glads ever introduced, and I love it. Want more this fall when you dig them. It is simply beautiful, and easily opens 10 in the field. The color attracts your eye from any viewpoint."

Mrs. Merrill, Oregon, writes: "Rose Plume is a beautiful flower. The color is out of this world. Some of the florets were nearly double."

KEEFER (Lines) 478 class. Here is a mighty interesting deep blue, bordering slightly on the purple side. Possibly the largest of the blues. Easily a leader in its class. Flecks some in hot weather, but still is a great favorite, especially with the ladies. Opens 9 or more 5½" florets on a nice long spike, with all the rest showing color. The buds are simply beautiful just before they open. Almost an Indigo blue and just like velvet. As they open they turn lighter in color. A great exhibition Glad. Scored 80 in the R. I. Trial Gardens. An extra early bloomer. L—\$2.00; 3, \$5.00. M—\$1.50; 3, \$4.00. S—\$1.00; 4, \$3.00. Blts., 10—\$1.50.

Bruce Collins, Mich., writes: "Keefer for me is more on the purple side, and easily opens 12 florets on a tall straight spike. Especially for exhibition. I believe it will beat any in commerce. Wish I had some for our local shows, it would make the boys sit up and take notice."

BUFF QUEEN (Lines) This is my only 1950 release. It is a very rich orange buff with almost no markings. Sometimes it flecks a bit on the edge of the petals, which really seems to add to its beauty. Consistently grows 5½ feet tall, and will hold its florets open in the field for days without damage. Opens 10 or more 6" florets on a long straight spike. Perfect double row placement. Extra good keeper. Have bloomed it five years and know it will hold up. Will release only a limited amount this year. Personally, I believe it will rank right along with my La Valle, Nellie Lou, Chinook, and the rest. Take it from me, it is really outstanding. Any size blub, \$5.00.

AN ASTOUNDING RECORD

Mr. Chas. Larus, of Hartford, Conn., each year tries out hundreds of new varieties, and in the fall he selects what he considers the ten most outstanding ones. To get one placed on this list is an honor for any hybridizer. Please look up this list in the 1950 NEGS yearbook. You will see he has placed La Valle, Nellie Lou, and Chinook, all three in this list, of the ten best 1949 introductions.

This should be proof enough of their quality and ability to win in any competition. These are not new, untried seedlings. I have bloomed them at least five years, and they seem to get better each year. Enough said. If you want to win, get La Valle, Nellie Lou, Chinook, Rose Plume, Buff Queen, and Keefer. Each one will win in its class. They are priced within the reach of any Glad fan.

PREMIUM BULBS

On an order for \$5.00 or more, I will include one bulb of either Diadem or Keefer, free. Your choice.

On a \$10.00 order two (2) bulbs of Diadem or Keefer, or one of each. Your choice.

On a \$15.00 order, one bulb of either La Valle, Nellie Lou, Chinook, or Rose Plume. Your choice.

On a \$25.00 order two (2) bulbs, one of La Valle, Chinook, or Rose Plume. Your choice.

Note.—It is not my intention to cut prices on anyone, but getting out a price list as early as I do, it is almost impossible to find the prevailing price on all the varieties. Where I cannot find out the price, I price them according to the stock I have.

Practically all the stock listed here has been grown from bulblets, or very small bulbs, thus assuring plenty of vigor. I am dividing my list into two classes—A and B. A will include the newer and higher priced ones; B, the older varieties that are priced lower.
